Education

Indiana University, School of Informatics and Computing — **August 2023 – Present**
B.S. Informatics; Minors in Web Design and Game Design — *Bloomington, IN*

Bishop Chatard High School
Indianapolis, IN

Experience

Front End Developer Intern — **June 2025 – August 2025**
Value Health
- Collaborated with front-end and back-end developers in weekly Agile sprints to deliver application features and meet project milestones.
- Developed front-end functionality using React, HTML, CSS, and Java while working with PostgreSQL-backed application data.
- Took a leadership role during weekly sprints to coordinate work and help ensure deliverables were completed on schedule.

Research Assistant Intern — **May 2024 – August 2024; May 2025 – August 2025**
JM Drew, LLC
- Designed an AI-assisted program using Python and spaCy to convert invoice information into structured Excel spreadsheets for easier analysis and access.
- Studied SOP agreements and developed familiarity with their structure, terminology, and navigation.
- Interviewed industry professionals to expand domain knowledge and support research initiatives.
- Researched specialty-drug distribution and the processes through which specialty pharmaceuticals reach consumers.

Customer Service and Sales Representative — **March 2017 – August 2023**
Sullivan's Hardware and Garden
- Assisted customers with product selection, location, utilization, returns, price matching, and store promotions.
- Provided in-person and call-center support to answer product questions and sell in-store merchandise.
- Promoted upcoming social events to support customer engagement and store revenue.
- Selected by management to assemble merchandise including grills, tables, and other products.

Academic Experience

UX Study Abroad Program — **May 2023 – June 2026**
Newcastle University
- Researched emerging artificial intelligence capabilities and potential applications within education.
- Collaborated with a team of UX design students to create scenario cards based on real-world situations encountered by educators.

Projects

Atlas Analytics – Multi-Agent Data Analysis Team | *Python, Pandas, SQL, SQLite, OpenAI API, Codex*
- Developed a Python and SQL analytics pipeline spanning retail, transportation, and energy datasets with reproducible data-quality checks and visual reporting.
- Integrated five specialized AI-agent roles for data quality, SQL review, insight generation, independent validation, and reporting.
- Implemented explicit agent handoffs and a review gate to validate analytical results before final reporting.

CS2 Competitive Analytics Dashboard | *Python, Pandas, PostgreSQL, SQL, Power BI, DAX, REST API*
- Built an end-to-end analytics pipeline using a REST API, Python, and PostgreSQL to collect, transform, and store 2,795 professional CS2 matches and 6,412 map records.
- Developed SQL queries and DAX measures to analyze player performance, team rankings, map trends, and upset rates across professional matches.
- Designed an interactive Power BI dashboard with KPI tracking, dynamic event, map, and date filters, player comparisons, and team-performance visualizations.

Technical Skills

Languages: Python, JavaScript, Java, C#, SQL, HTML, CSS

Frameworks & Libraries: React, Pandas, spaCy

Databases: PostgreSQL, SQLite

Data & Analytics: Power BI, DAX, Excel, Data Visualization, Data Analysis, Data Cleaning, ETL, KPI Development

AI & Development Tools: OpenAI API, Agentic AI, Codex, Claude Code, Cursor, REST APIs, Git, GitHub

Development Concepts: Agile Development, Sprint Planning, Front-End Development, API Integration, Relational Databases, Version Control, CI/CD
